LEARNING SPACES

Cooking up ideas for a former Server Room at ETH Seminarweek FS23

How do we enable informal learning?

The RZ Building (Rechenzentrum), situated in the city center of Zurich, hosts a retired server room of ETH, whose infrastructure is no longer needed. We invite you to join us in transforming part of this retired ETH Server Room into a Learning Space. By re-using and upcycling existing resources and materials, we will build mobile furniture elements to promote collective moments of gathering, meeting, and eating as an integral part of informal learning. Experts from various fields will accompany us during the week to provide a broad spectrum of different perspectives on the approaches developed by us. The gradual cooking up of the constructions in the Raplab workshops allows for different uses and behaviors to be tested, from the first prototypes and improvised situations to a curated final dinner with guests.

20-24.03.2023 | 12 Participants | Cost frame: A
