

SEMINAR WEEK | SPRING SEMESTER 2024
PROF. HOLZER | INSTITUT FÜR DENKMALPFLEGE UND BAUFORSCHUNG

BOURGOGNE

FROM GOTHIC TO CONCRETE

In a round trip starting in Dijon we will explore Burgundy's rich cultural heritage, focusing on its renowned Gothic churches like the Basilique Sainte-Marie-Madeleine in Vézelay and the Cathédrale Saint-Étienne in Auxerre. Beyond the medieval era, we will study some of the oldest concrete monuments and uncover the history and innovation behind concrete construction in modern landmarks that testify to Burgundy's architectural evolution. Amidst picturesque landscapes and charming towns, gain a comprehensive understanding of building archaeology and construction history. Join this expedition to unravel the layers of history woven into Burgundy's architectural treasures.

The fee includes accommodation, breakfast, transport from Basel, one reception and one dinner, as well as the reader.

17.03. - 22.03.2023
