COMPOSITE FIGURE BARCELONA

The architectural form of the future will be a composite figure. This will require new visual assemblies and a new sense of tectonics – a culture of loose arrangements and a more complex way of perceiving unity in diversity.

In Barcelona we will look for common ground in seemingly conflicting formal approaches. Our tolerance towards ambiguity will increase. We will learn to look beyond the obvious unity of material and linguistics and acquire new expressive freedoms.

We will look at the work of Antoni Gaudí, Enric Miralles, Carme Pinós, Benedetta Tagliabue, MAIO and Flores i Prats, among others. We will make studio visits, to discuss the idea of the composite figure with our Catalan colleagues.

Site visits, local transportation and accommodation are included. Please arrange your own travel to and from Barcelona (price range C).
